### 13 - What do you consider to be this TA's greatest strength?

**Response Rate** 14/16 (87.5%)

- He communicates well wit his students and is very enthusiastic about the labs we perform.
- knowledge of the subject and ability to help students
- Daniel is absolutely outstanding at his job, I would say teaching was made for him. Along with being knowledgeable and a great teacher, he is kind, relatable, funny. He perfectly balances creating a comfortable and somewhat fun environment, while also making sure that work gets done and that students learn something valuable. I am definitely the type of student that HATES asking questions. I itch to ask them especially when I don't understand something but something about doing so in front of my peers makes me uncomfortable. However, in lab Daniel creates the perfect environment to do so. I never feel awkward or scared to ask or answer questions in lab.
- hes awesome
- Definitely his assignment feedback. Daniel takes time to print off assignments for meetings and add comments to review in person, which greatly helped my ability to succeed in the course.
- Eager to help students
- Daniel is awesome at explaining difficult concepts and procedures!
- Their ability to answer any difficult questions and help the students.
- His presentations are great.
- He explains everything very clearly!
- The ability to understand the questions we had, even if they didn't always make sense. He was always able to help me understand a lab topic easily based on his descriptions
- Being able to walk through step by step difficult content and alowsays very helpful!
- His greatest strength is ensuring the students fully understand the material we're focusing on in each lab.
- He knew a lot of information and could explain thing well.

### 14 - What do you consider to be this TA's greatest weakness?

**Response Rate** 13/16 (81.25%)

- Nothing really.
- none
- somewhat of a harsh grader
- Nothing!
- Lab report clarity... taking off points for lab worksheets when other TAs didnt
- Nothing in particular stood out
- They explain too quick.
- His response time to emails could be a little quicker.
- Literally nothing!
- not a thing
- No weaknessAI
- Lab report instructions were kind of unclear and contradictory, but other than that, he was an amazing TA.
- He could have responded to emails quicker.
